DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5, 7-13, 15, 17-20, 22-30, and 32-35 are allowed over prior art of record.
2. The following is an examiner's statement of reasons for allowance: Araki (*US Patent No. 6725192*) discloses an audio coding and quantization method in that each block of samples of the audio signal is converted into a number of spectral sub-band components. Spectral sub-band components are then subjected to the psychoacoustic model for analysis of allowable distortion level and generation of scalefactors. Scalefactors are used in controlling the operation of the quantizer. Araki fails to specifically disclose the step of calculating a given total scaling value A_{sfb} for a particular frequency scalefactor band according to the equation: $A_{sfb} = 2^{4/(9BW_{sfb})^{2/3}} * (1/M_{sfb})^{2/3} * (\sum(x_i))^{1/3}$, where BW_{sfb} is the bandwidth of the particular frequency scalefactor band, M_{sfb} is the corresponding distortion threshold, and $(\sum(x_i))$ is the sum of all of the transform coefficients for the particular scalefactor band. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to modify Araki in order to obtain the claimed invention having subject matters claimed above. Therefore, claims 1-5, 7-13, 15, 17-20, 22-30, and 32-35 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
